- D. Click the Allowed To Join Domain button in the New Computer dialog box

Answer: B

#### QUESTION 2

Your manager has asked you to create various user objects using Windows PowerShell. Which of the following must you do to accomplish this?

- A. Use the Create-User createUser
- B. Use the objUser = new OUUser statement
- C. Use the AddUser method of ADSI
- D. Invoke the Create method of OU

Answer: D

#### QUESTION 3

After setting up several Active Directory users for different OU's, you discover that the IT technician has miss spelt the Office property as Londn instead of London. Which tool should you use to correct the changes to all of the OU's at once?

- A. Use Dsget and Dsmod
- B. Use Dsquery and Dsmod
- C. Use MoveTo or MoveHere
- D. Multi select the users using the Ctrl key and opening Properties

Answer: B

Explanation: You can use Dsquery to query AD users by property values. So in this case we could query on the miss spelt word Londn.

#### QUESTION 4
