

**考試編碼:**C2040-986

**考試名稱:** Creating IBM Lotus Notes  
and Domino 8.5 Applications with  
Xpages and Advanced Techniques

**版本:** Demo

**QUESTION NO: 1**

Barney imports a WSDL file into a LotusScript script library, which generates code to call the Web service methods defined by the WSDL file. Where can he use this script library?

- A.** Only in agents
- B.** Only in agents that run on the server
- C.** Only in agents and form or view actions
- D.** Anywhere that LotusScript can be used

**Answer: D**

**QUESTION NO: 2**

Marge wants to track user preference information while users navigate through her Web site, but does not want to require users to authenticate when accessing the site. Which of the following should she use to track the user information?

- A.** Cookies
- B.** Servlets
- C.** User profile documents
- D.** The users must authenticate

**Answer: A**

**QUESTION NO: 3**

Winnie is enhancing the interface on the Corporate Phone Book Web application. Ted, the graphics designer who is providing Winnie with the images for her Domino application, has suggested that she use image resource sets. What is a feature that Winnie can incorporate by using image resource sets?

- A.** A vertical image set can be used to incorporate effects using the onmouseover, onmouseout, and onclick events of an image on an XPage.
- B.** A vertical image set can be used to incorporate effects using the Normal, Mouse-over, Selected, and Mouse-down image states of a Domino Web page image.
- C.** A horizontal image set can be used to add effects when a user hovers the mouse over an image. For example, the normal image could be replaced with a larger image when the mouse hovers over it.
- D.** A horizontal image set can be used to add effects when a user hovers the mouse over an image. For example the normal image could be replaced with an image with different coloring when the mouse hovers over it.

**Answer: D**

**QUESTION NO: 4**

What is the purpose of using XSLT in a Lotus Domino Web application?

- A. To define what DXL should be available for export.
- B. To allow a Web service to interact with a Java agent.
- C. To display a view as HTML without using a Java applet.
- D. To transform XML documents to HTML or even to another XML document.

**Answer: D**

**QUESTION NO: 5**

To approve an expense report, Quy goes to a controlled-access section and marks the Status field "Approved". Status is a sign-enabled field. When is the signature attached?

- A. Immediately
- B. When the document is saved
- C. When the document is mailed
- D. When the document is encrypted

**Answer: B**

**QUESTION NO: 6**

Josh needs to associate the Price and ProductName fields of the Sales database with fields from the Inventory table in a relational database. His company uses DECS. He has created a Data Connection Resource to handle the connection to the Inventory table. What is the next step to make this connection available to fields on the Product form?

- A. From the Advanced tab of the ACL, select "Allow connection to external databases using DCRs". From the Defaults tab of the Product form properties dialog, click Browse by the Data Source Options and select the DCR.
- B. From the Advanced tab of the database Properties, select "Allow connection to external databases using DCRs". From the Data Connection Resource properties, select the Product form under "Connection enabled for?"
- C. From the Advanced tab of the ACL, select "Allow connection to external databases using DCRs". From the Security tab of the Form Properties dialog, click Browse by the Data Source Options and select the DCR.
- D. From the Basics tab of the Database properties, select "Allow connection to external databases using DCRs". From the Defaults tab of the Form Properties dialog, click Browse by the Data Source Options and select the DCR.

**Answer: D**

**QUESTION NO: 7**

Dierdre is periodically asked to update the Readers field in documents created with the SalesOrder form. If a person's name changes, they are no longer able to access documents they'd been able to access in the past. Dierdre would like the Readers fields to be automatically updated when someone's name has been changed in the Domino directory. How can she do this?

- A.** Open the Security tab of the SalesOrder Form properties. Place a checkmark next to "Enable adminp updates".
- B.** Open the Advanced tab of the database ACL. In the selection list for Action, choose "Modify all Readers and Authors fields".
- C.** Open the Security tab of the Database properties. In the selection list for Administration Actions, choose "Update all Readers and Authors fields".
- D.** Ask a Notes Administrator to enable "Maintain Reader/Author field consistency" on the Security tab of the server document for her application server.

**Answer: B**

**QUESTION NO: 8**

Juanes needs to import some data from a custom application not using a standard database engine, which is being migrated to a Lotus Notes/Domino application. How can he accomplish this task?

- A.** Use Lotus Enterprise Integrator.
- B.** Import data using one of the built-in connection services like DECS or connectors.
- C.** Export the data to XML on the old application and import it using XMLT.
- D.** Export the data from the old application to one or more ASCII files and import them by using LotusScript file access methods.

**Answer: D**

**QUESTION NO: 9**

Which of the following describes the destination URL that is generated by Lotus Domino when the user enters \*/projects/cio/index.html as the URL?

- A.** /projects/cio.nsf/index?OpenPage
- B.** /projects/index.nsf/cio?OpenPage
- C.** /projects/projects.nsf/cio?OpenPage
- D.** /projects/cio.nsf/index.html}

**Answer: A**

**QUESTION NO: 10**

Mary is posting a discussion database on the Web. She would like to give general users Author access to the database, as long as they identify themselves and have registered with her site.

Which one of the following should Mary do to ensure that all users accessing her database are identified and have Author access?

- A. Create an Authors field on her forms and set it to Anonymous.
- B. Set the database ACL Default entry to No Access and set the Anonymous to Author.
- C. Set the database ACL Default entry to Author and set the Anonymous to No Access.
- D. Set the form security property, "Who can create documents with this form", to only allow users in the Author role.

**Answer: C**

**QUESTION NO: 11**
