**Prüfungsnummer:** CTFL-001

**Prüfungsname:** ISTQB Certified Tester  
Foundation Level (CTFL\_001)

**Version:** Demo

### **QUESTION NO: 1**

Which of the following would you expect to see in the master test plan? 1 credit

- A.** A description of how the test cases are cross-referenced to requirements in the test management tool.
- B.** A detailed identification of the resources that will carry out structural testing in the first iteration.
- C.** The test approach that will be applied at system integration testing.
- D.** A list of the names of the testers who will carry out the performance testing for the final iteration.

**Answer: C**

### **QUESTION NO: 2**

Which of the following would be the TWO most appropriate examples of entry criteria documented in the system integration test plan? 2 credits

- A.** The percentage of decision coverage achieved during unit testing.
- B.** The availability of the latest version of the capture-replay tool (for testing the interface with the newly developed test management tool).
- C.** The sign-off of a performance test software release note (test item transmittal report) by both development and testing showing that system performance meets the specified acceptance criteria.
- D.** The percentage of acceptance test procedures scheduled for execution.
- E.** The percentage of requirements coverage achieved during system integration test.

**Answer: A,B**

### **QUESTION NO: 3**

Which test management control option is most appropriate to adopt under these circumstances? 2 credits

- A.** Introduce mandatory evening and weekend working to retrieve the 3 week slippage.
- B.** Reconsider the exit criteria and review the test plan in the context of the current situation.
- C.** Advise the user community regarding the reduced scope of requirements and the additional incremental delivery.
- D.** Arrange a meeting with the user community representatives to discuss the user interface.

**Answer: B**

**QUESTION NO: 4**

Risks should be constantly reviewed. Given the current situation, which one of the following factors is most likely to lead to a revised view of product risk? 3 credits

- A.** The concerns over the user interface may lead to changes to the interface which cannot be implemented by development in time for the second test iteration.
- B.** The concerns over the user interface raises the likelihood of a risk in that area and increases the amount of test effort needed for the user interface, thereby limiting the test effort available for other parts of the test management tool.
- C.** The delivery of the application without the interface changes may upset the user community.
- D.** The method used for test estimation is not accurate enough and hence the money spent on testing exceeded its budget.

**Answer: B**

**QUESTION NO: 5**

Which of the following is least likely to be used as a technique to identify project and product risks? 1 credit

- A.** Brainstorming
- B.** Inspections
- C.** Expert interviews
- D.** Independent assessments

**Answer: B**

**QUESTION NO: 6**

You have been asked to write a testing strategy for the company. Which statement best explains how risk can be addressed within the testing strategy? 1 credit

- A.** A test strategy should address identified generic product risks and present a

process for mitigating those risks in line with the testing policy.

**B.** A test strategy identifies the specific product for a project risk and defines the approach for the test project.

**C.** A test strategy is derived from the test policy and describes the way risk assessments are performed in projects.

**D.** A test strategy is the result of a project risk analysis and defines the approach and resources for testing.

**Answer: A**
