                      Certification Exam

Version :   Demo

QUESTION 1
Which of the following would be an advantage to using a blade server as opposed to a rack mount server?

A.
Blade servers allow for internal tape drives

B.
Blade servers offer more rack density

C.
Blade servers are typically faster

D.
Blade servers allow for more RAM
Answer: B

QUESTION 2
A stripe set of maximum size is to be configured using two physical disks. One disk has 150GB andthe other has 250GB in unallocated space. Which of the following will be the size of the stripe set?

A.
150GB

B.
300GB

C.
400GB

D.
500GB
Answer: B

QUESTION 3
A technician has a current baseline and is told to install additional memory and a faster NIC card. At which point in time should the next baseline be run?

A.
After the memory is installed

B.

Before the upgrade is performed

C.
After the NIC is installed

D.
After the upgrades are performed
Answer: D

QUESTION 4
Users report that they are unable to connect to a server. An administrator confirms that it isunreachable across the network. Other administrators have been working in the server room throughout the day. Which of the following is the NEXT step the administrator should take?

A.

A.
Enhanced stability

B.
Vendor supported

C.
Higher number of available component choices

D.
Lower cost

E.
Enhanced security

Answer: AB

QUESTION 13
Which of the following is the minimum number of drives in an RAID 0 configuration?
A.
2

B.
3

C.
4

D.
5
Answer: A

QUESTION 14
A user cannot access files on /deps/it directory, the administrator verifies permissions are set rw------- for the directory. Which of the following actions need to be performed to only grant read access to the user on the IT directory?
A.
Set folder permissions to 760.

B.
Set folder permissions to 770.

C.
Set folder permissions to modify.

D.
Set folder permissions to full control.
Answer: A

QUESTION 15

A.
Server virtualization increases server application performance allowing productivity to be increased.

B.

Server virtualization simplifies server administration and reduces the IT department staffing needs.

C.
Server virtualization implements higher security measures at the server OS level reducing the need for other security implementations.

D.
Server virtualization is a more efficient use of hardware for multiple servers reducing the resource utilization.
Answer: D

QUESTION 16
Which of the following expansion cards should be installed into a server to provide iSCSI SAN connectivity?
A.
HBA

B.
PBX

C.
VoIP

D.
NIC
Answer: D

QUESTION 17
Which of the following technologies allows multiple logical subnets to span an entire physical switched network?
A.
ARP

B.
DMZ

C.
VLAN

D.
VPN
Answer: C

QUESTION 18
Which of the following is the BEST recovery method for a server that only aggregates report data and stores data on separate servers?
A.
Full

B.
Disk imaging

C.
Incremental

D.
Tape backup
Answer: B

QUESTION 19
Which of the following internal storage technologies has the HIGHEST single drive storage capacity?
A.
SAS

B.
SATA

C.
Flash

D.
SCSI
Answer: B

QUESTION 20
Which of the following is a benefit of NAS over SAN?

A.
Higher data integrity

B.
Lower cost of implementation

C.
Higher redundancy

D.
Increased performance
Answer: B
